

VACCINE FACTS CHILDHOOD SCHEDULE

THE
IMMUNIZATION
PARTNERSHIP

WHY FOLLOW THE CHILDHOOD VACCINE SCHEDULE?

The schedule ensures your child is protected from potentially serious diseases at exactly the right time.

PERFECT TIMING

The schedule is designed to provide maximum protection as safely as possible.

PREVENT ILLNESS

Children will be fully protected when they get **ALL** recommended doses of each vaccine.

PLAN PROTECTION

Vaccines help build a lifetime of immunity.

VACCINE FACTS

- ➔ Vaccines protect against 18 diseases and 7 cancers.
- ➔ It is safe to get more than one vaccine at a time.
- ➔ Vaccines are scheduled based on when a child is likely to be most susceptible to the disease.

To learn more you can find accurate, provider-based guidance from:

- American Academy of Pediatrics (AAP) — aap.org
- American Academy of Family Physicians (AAFP) — aafp.org

Delaying, withholding, or spacing out vaccines leaves your child more vulnerable to diseases.
